

Fortran Specialist Group Web Editor's Report 2018-2019

This is my second year as Web Editor having taken over from the previous editor who stepped down after 20 years.

There have been no major updates this year, the main additions have been new entries to the News section, the most frequent being updates on the progress of Fortran standardisation.

In addition to updates for the committee members and for meetings, the following additions were made to the site this year:

- Contact information was reduced for committee members as per BCS guidance.
- Update for member joining information and removal of outdated reference to a BCS benefit of reduced price software.
- Publication of the final report from the Fortran Standardisation benefits survey.

Harvey Richardson
Web editor, Fortran Specialist Group
