

Fortran Specialist Group Web Editor's Report 2019-2020

A significant update was made to the historical section of the website this year which included many new documents covering meetings in the 1970s and over one hundred updates to material from the following two decades. The web editor wishes to thank our Archivist David Muxworthy for providing this material in a form allowing relatively easy integration into the website.

In addition to updates for the committee members, standards process updates, news and meetings, the following addition was made to the site this year:

- Summary of the Q&A session at the 2019 following meeting published.

One issue that remains to be dealt with relates to the demise of the Nag archive and the many links that reference this on the website.
