

Fortran Specialist Group Web Editor's Report 2020-2021

This year, a project was started to work through the website replacing references to the Nag standards document archive with links to the WG5 documentation page. So far most references to specific "N" documents have been replaced. There are remaining references to some standing documents that could be changed and as yet no attempt has been made to change documents in PDF format.

In addition to updates for the committee members, small fixes and news, the following addition was made to the site this year:

- Interim standards update published in June 2020
