

Fortran Specialist Group Web Editor's Report 2021-2022

Only minimal changes to the website were made this year, for example small corrections to pages and updates for the committee membership along with the announcement for the 2022 AGM and meeting.

Last year many references to standards documents previously available at the Nag site were replaced with links to the WG5 documentation page. Although references remained in PDF documents I decided not to attempt to fix these this year.

During the year, the BCS changed the mechanism to update the website from FTP to FTPS and it took some time to find a way to update the site from a Microsoft Windows environment. A request was made of the BCS to provide more information on this change and it is hoped that advice will be forthcoming on the relevant settings for common clients.
